Note accompanying the Financial Statement

1. **CYC-Net exists in terms of its internet presence and its email-based discussion group.**

It owns no tangible property or equipment. It is a voluntary, participatory association which is constituted to fulfill its aims and objectives. Its "assets" comprise its intellectual property of collected written documents which service the child and youth care profession, in terms of academic and practice needs.

With this in mind, the Board of Governors and Executive Committee of CYC-Net decided that it should outsource its technological and staffing requirements to a publishing and web application company to provide all of its technical and editorial services.

In turn, they provide all of the following services: supply of technical infrastructure in terms of computers, utilities, software, telephone and fax facilities, e-mail and internet connectivity, servers to accommodate all web requirements, web application programming and coding of all web services, including graphics, web design, database management and other interactive web facilities, along with strong editorial/academic/publishing oversight of content, responsive to the needs and requests of the association.
